

STEPHEN DAVID

Full-Stack Web Developer | Melbourne, VIC

stephen.david.06@gmail.com | [+61 477 274 245](tel:+61477274245) | stephendavid.dev

PROFESSIONAL SUMMARY

Full-stack web developer with 10+ years delivering responsive, scalable websites and applications across agency, in-house product, and freelance environments. Hands-on across modern JavaScript (Next.js, Remix, React, Vue), PHP-based CMSes (WordPress, Payload, Silverstripe, Shopify), and Node.js back-ends, with a track record of mentoring developers, shaping technical direction, and shipping production work on deadline.

CORE SKILLS

Front-end: HTML, CSS/SCSS, TailwindCSS, TypeScript, React, Vue.js, Next.js, Remix.run, React Router

Back-end: PHP, Laravel, C# / .NET, Node.js, MySQL, GraphQL, Hygraph, Supabase

CMS & E-commerce: WordPress, Payload CMS, Silverstripe, Shopify (Liquid)

DevOps & Tools: Docker, DDEV, GitHub Actions, Cloudflare, Vercel, GCP, cPanel/WHM, Coolify

AI & Automation: Claude Code, Anthropic API, OpenAI / Codex, Prompt Engineering, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer | Bear Marketing

Kelvin Grove, QLD · Jun 2026 – Present

Leading full-stack delivery across Next.js, Payload CMS, WordPress, and Shopify projects for a digital marketing agency, while mentoring a developer and owning technical quality.

- Mentor a developer through code reviews, pairing, and clearer engineering standards
- Collaborate directly with internal stakeholders to translate business, marketing, and campaign requirements into practical technical solutions delivered on deadline
- Build client sites and apps in Next.js, WordPress, and Shopify — responsive front-ends, server-side logic, CMS integration
- Develop Payload CMS content models, custom admin behaviour, and dynamic page structures
- Maintain and customise Shopify storefronts for marketing, e-commerce, and campaign requirements
- Own solution design, estimation, and delivery of complex requirements; manage releases on Coolify, Vultr, and other hosting platforms

Senior Full-Stack Web Developer / Lead AI Developer | Point Hacks Australia

Elsternwick, VIC · May 2023 – Jun 2026

Developed and optimised the Point Hacks and Australian Frequent Flyer websites and community platforms, and led AI tooling adoption across the team.

- Evolved into an AI-driven developer by integrating LLM APIs and modern AI frameworks into day-to-day delivery, using AI as leverage to rapidly prototype features, automate repetitive engineering tasks, and shorten iteration cycles
- Built lightweight AI tools that removed friction from editorial, content, and engineering workflows
- Led new developers' technical direction through code reviews, pairing, and architectural coaching
- Rebuilt the Point Hacks website in Laravel with a new design, templating, and back-end architecture
- Built the Point Hacks Concierge app in Remix.run, syncing content via GraphQL (Hygraph, PocketBase)

Senior Full-Stack Developer | The Refinery Ltd

Prahran, VIC · Jul 2021 – May 2023

Led a small development team delivering full-stack websites for a digital marketing agency.

- Delivered end-to-end Silverstripe CMS builds, implementing creative designs with Bootstrap
- Built back-end logic and front-end functionality with React.js, jQuery, and Grunt
- Designed database structures and administered WHM, cPanel, domains, and SSL across client sites

Systems Administrator / Business Analyst / Full-Stack Developer | Shuk Engineering Distributors Ltd

Auckland, New Zealand · Jun 2017 – Jun 2021

Owned IT operations and business intelligence for a distribution company.

- Wrote MySQL reporting scripts and produced purchase forecasts for inventory and cashflow planning
- Administered CRM, inventory, and security databases, correcting data inconsistencies
- Developed the company website and managed core IT systems including Cin7, Microsoft 365, and Exchange

Full-Stack Developer / Office Administrator | Kiwise Digital Agency

Auckland, New Zealand · Jun 2015 – Jun 2017

Sole developer across client websites, mobile apps, and games.

- Built end-to-end WordPress websites and client web applications in C# / .NET
- Developed 2D games with Cocos2D and mobile apps with React Native
- Set engineering standards as tech lead and trained incoming juniors and interns across the stack

Software Engineer Intern | Accordo Group Limited

Auckland, New Zealand · Dec 2014 – Feb 2015

- Assisted in designing and developing high-value business features and their databases
- Created and executed test cases for feature development

OTHER WORKS

Freelance Full-Stack Developer | Self-employed

Australia / New Zealand · Feb 2024 – Present

Delivering scalable web solutions and responsive sites for small businesses and creatives.

- Built full-stack WordPress sites and custom themes for clients including Freddie Pitts Studio, Chingu Gel, Whitecomb Range, and Gelo Cruz
- Built Next.js sites including my portfolio (stephendavid.dev) and landing pages for Safe as 3 Houses and Kinetic Effect
- Maintain and extend Shopify storefronts with custom Liquid development, including fansycake.com
- Delivered .NET back-end features and integrations extending existing enterprise systems

EDUCATION

Bachelor of Science, Major in Computer Science

University of Auckland
