PROFESSIONAL SUMMARY

Lead full-stack developer with 10+ years shipping production web platforms, and a consistent record of leading the developers around me by mentoring through code review and pairing, setting the engineering standards a team works to, and owning technical direction from estimate to release. Have led development teams in agency settings, spearheaded platform rebuilds and greenfield builds, and driven team-wide adoption of AI-assisted development while staying hands-on in the codebase.

LEADERSHIP HIGHLIGHTS

- **Mentoring & coaching:** Mentor developers through code review, pairing, and architectural coaching at Bear Marketing and Point Hacks; trained intermediate, juniors, and interns across the stack at Kiwise.
- **Team leadership:** Led a development team delivering client websites at The Refinery, and set the engineering standards the team worked to as tech lead at Kiwise.
- **Spearheading projects:** Drove the Point Hacks rebuild in Laravel, led the greenfield Concierge app in Remix.run, and the company's AI development lead.
- **Technical direction & ownership:** Own solution design, estimation, delivery, and releases for complex requirements; owned IT operations and business intelligence end to end for a distribution company.
- **Stakeholder partnership:** Turn business, marketing, and campaign requirements into practical technical solutions delivered on deadline.

CORE SKILLS

Leadership & Delivery: Mentoring & Coaching, Code Review, Pair Programming, Technical Direction, Engineering Standards, Solution Design, Estimation, Stakeholder Management, Release Management

CMS & E-commerce: WordPress, Payload CMS, Silverstripe, Shopify (Liquid)

DevOps & AI: Docker, DDEV, GitHub Actions, Cloudflare, Vercel, GCP, cPanel/WHM, Coolify, Claude Code, Anthropic API, OpenAI / Codex, Prompt Engineering

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer / Team Lead | Bear Marketing

Kelvin Grove, QLD · Jun 2026 - Present

Lead full-stack delivery for a digital marketing agency, mentoring developers, owning technical quality, and driving requirements from estimate to release.

- Mentor developers through code reviews, pairing, and clearer engineering standards
- Own technical quality, solution design, estimation, and release management across the team's work, deploying on Coolify, Vultr, and other hosting platforms
- Collaborate directly with internal stakeholders to translate business, marketing, and campaign requirements into practical technical solutions delivered on deadline
- Lead delivery in Next.js, Payload CMS, WordPress, and Shopify: front-ends, server-side logic, content models, and custom admin behaviour

Senior Full-Stack Developer / AI Developer Lead | Point Hacks Australia

Elsternwick, VIC · May 2023 - Jun 2026

Led the development of AI-driven solutions for a tech startup, focusing on integrating large language models and modern AI frameworks to enhance product capabilities.

- Drove technical direction through code reviews, pairing, and architectural coaching
- Mentored intermediate and junior developers towards independent delivery of AI solutions
- Spearheaded the team's shift to AI-driven development, integrating LLM APIs and modern AI frameworks to prototype features, automate repetitive engineering tasks, and shorten iteration cycles
- Built lightweight AI tools that removed friction from editorial, content, and engineering workflows
- Worked on the Point Hacks rebuild in Laravel, and led the greenfield Concierge app in Remix.run, syncing content via GraphQL (Hygraph, PocketBase)

Senior Full-Stack Developer / Tech Team Lead | The Refinery Ltd

Prahran, VIC · Jul 2021 - May 2023

Led a development team through end-to-end delivery of client websites for a digital marketing agency

- Led a development team through end-to-end delivery of client websites for a digital marketing agency
- Delivered Silverstripe CMS builds, implementing creative designs with Bootstrap, React.js, jQuery, and Grunt
- Designed database structures and administered WHM, cPanel, domains, and SSL across client sites

Full-Stack Developer / Senior Systems and Business Analyst / IT Operations Lead | Shuk Engineering Distributors Ltd

Auckland, New Zealand · Jun 2017 - Jun 2021

Owned IT operations and business intelligence for a distribution company. This includes IT administrative work as well as creating and maintaining the company's client facing product and the backend associated with it.

- Owned IT operations and core systems end to end, including Cin7, Microsoft 365, and Exchange
- Produced purchase forecasts used for inventory and cashflow planning, and wrote the MySQL reporting behind them
- Administered CRM, inventory, and security databases, and developed the company website

Full-Stack Developer / Development Team Supervisor | Kiwise Digital Agency

Auckland, New Zealand · Jun 2015 - Jun 2017

Led a development team delivering client websites for a digital marketing agency, and set the engineering standards the team worked to.

- Set engineering standards as development supervisor and trained incoming juniors and interns across the stack
- Owned delivery end to end as sole developer, building WordPress websites and client web applications in C# / .NET

OTHER WORKS

Freelance Full-Stack Developer | Self-employed

Australia / New Zealand · Feb 2024 - Present

- Own each engagement end to end: scoping, technical approach, delivery, and post-launch support
- Built WordPress sites and custom themes for Freddie Pitts Studio, Chingu Gel, Whitecomb Range, and Gelo Cruz, and Next.js sites including stephendavid.dev, Safe as 3 Houses, and Kinetic Effect
- Maintain Shopify storefronts with custom Liquid development, and delivered .NET features extending existing enterprise systems

EDUCATION

Bachelor of Science, Major in Computer Science

University of Auckland
